Art Unit: 1772

1. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Marchese (2,732,065).

Marchese relates to an adhesive strip of foldable material (26) comprising at least three panels with each of said panels having a common edge with the next panel. As shown in figure- 4, the strip includes panels (32), ~~(26)~~³⁰ and (32), respectively, wherein the base panel is taken to be ~~(26)~~³⁰ and the side panels are (32) and (32). Each of the panels has a predefined width W and is separated from the next panel by a line of perforation that can perform as a hinge. Figure-4 also shows that the width of the base panel is wider than each of the side panels.

The intended use phrase such as "to fold", "for permitting", "when folded", etc. have not been given patentable weight as the phrases are not found to be positive limitations.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1772

5. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marchese.

Marchese, as discussed above, fails to teach or suggest that the width of the third panel is less than that of the first and second panels, or that the first panel width is smaller than the second and the second panel width is smaller than the third panel. It would have been an obvious matter of design choice to modify Marchese by providing a third panel that is less wide than the first and second panels, or each of the second and third panels are increasing in width than the first panel based on optimization through routine experimentation to obtain a smaller width panel at one end to facilitate folding and bonding.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is (703) 308-4424. The examiner can normally be reached on Monday through Thursday from 7:30AM to 5:00PM. The examiner can also be reached on alternate Friday.
